

Higher Technical Certificate of Logistics and Transportation

The missions of the Higher Technical Certificate of Logistics and Transportation (College Degree)

- Exploitation of merchandise transport operations
- Organization and management of transport-related logistics activities
- Customer relationship management
- Team management

Access to training:

Certificate training is opened to graduates from:

- High School (science, economics, literature, and services)
- Professional High School (Logistics and Transportation)

With a Higher Technical Certificate of Logistics and Transportation in hand, you will be in charge of helping a business manager or an operations manager in the domain of road haulage, sea and air freight, on a national or international level.

This certificate will allow you to access opened and evolving professional career paths, and follow up your studies by specializing in a specific means of transport (air, sea, road...) or in the domain of logistics. The Higher Technical Certificate of Logistics and Transportation will give you the necessary accreditation to work as a shipper, an accreditation delivered by the DEAL (the Department of Housing, Spatial Planning and the Environment).

- 30 hours of class
- 13 weeks of work placement
